## SECRET TESTS MADE OF NEW MACHINE GUN

No Explosive Used; Noiseless Decision Is Rendered Con-Operation Claimed.

of machine gun, operating by centrifugal the United States Court of Claims to-day force and using no explosive, is being secretly tested by army officials and other governmental experts at the bureau of standards. The weapon is said to have a capacity of 11,000 shots a minute against the 500 or 600 of the present types of explosive gun, but its mussle verocity is only 1,210 feet per second, at 11,000 revolutions per minute, as compared with 2,700 feet of the Browning gun.

The great advantage of the centrifugal gun, army experts say, will be in its

The great advantage of the centrifugal gun, army experts say, will be in its noiseless operation, which should make it difficult of location by an enemy.

The gun consists of a rotating barrel, approximately one-half inch in diameter, attached to motor driven shafts, the speed of which is under instant control. By varying the mead of the drivents the result of the case. ing shaft the operator controls the range and is able to determine the fire of the weapon by adjusting the feed to increase or diminish the number of projectiles inserted in the chamber in a given period.
